

Overview

Our Story:

Capsicum Group, LLC was founded in 2000 within the law firm of Pepper Hamilton, LLP to provide information technology support to their clients. It soon became apparent that the firm and its clients needed help in understanding and responding to the many requests surrounding electronic data. Since that time, digital evidence has increasingly become more critical, fast-paced and costly. Our aim was to focus on the quality, responsiveness and efficiency of the discovery process. And in 2002, Capsicum became a corporation, and today, remains an independent business entity.
